Description:
This data collection contains baptism and burial records from 1538-1812 and marriage records from 1538-1753 for more than 10,000 Church of England parish registers (including Bishop's Transcripts) from parishes in the greater London area. They are taken from registers held at London Metropolitan Archives as well as those formerly at Guildhall Manuscripts Section. Please note that some marriages will be found in this data collection after 1753 as not all churches started recording marriages in separate registers from this date. [Learn more...](#)
