Description: The wife of Parmenas Barnes is frequently erroneously listed in online trees as "Margaret M Guthrie" or as the daughter of James Guthrie & Elizabeth Eilor. These were three different women. This chart should help differentiate the facts for each of them. There is also some doubt as to whether or not Parmenas Barnes' wife's maiden name was even Guthrie. So far no documented proof has been found. The death certificate of her daughter Phoebe Barnes Workman actually lists her mother's maiden name as Carnes, but a secondary source to confirm this information has yet to be found.
