

I enjoyed immediately after Deposito both Regentsen, monastery and Ligpenge and in two years I ate at the monastery, the University of Copenhagen as Alumen Fixus, but with no position openings to enjoy in Copenhagen, and my mother, nothing could help me. I resolved to travel to Norway, where I conditioned by Dean Gerhard Winge Sande udi county Jarlsberg immediately at Drammen, as well was he pleased with me and I with him, and I read as both his and the other children from Christiania.

Aforesaid Dean took with me the first time with these words: "Expectus ades", and we talked as nothing else than Latin in the two years, since. from harvest in 1733 to Midsummer Days Time 1735. Same Man's great Raisonoabilitet, thorough learning, great Nature's Gifts, edifying preaching-way, great insight into poetry both the Danish and the Latin language, EXPEDITE tongue, which even went so far that he could speak ex tempore verse, I by no means pass over, as also well understood both Vocal- and Instrumental-music, so I could never wish for better, saner and more kindly and more Principal. We left each other with sad hearts and moist eyes, and I had to give my promise from me ei longer being from Norway than I got my Attestats.

This Løvte I had also met if I had not been a better appointment in Frederiksborg. I was offered Collega and Cantor in 1736, in the King, Latin School, yet I would not take this firdelagtigere livings, until I got Dean Winges written Permission, congratulations and Valediction. In the ten years I was a colleague of Frederiksborg, I learned many things both spiritual as physical as I Auxilio Dei hopes to have the utility of the day of my death.
